**DETAILED ACTION**

***Specification***

1. The disclosure is objected to because of the following informalities: the phrase "which less cost the provider" should be changed to "which costs the provider less" (Page 3, Line 7), sentence does not seem complete (Page 5, Lines 7-11), "photographic camera" should be changed to "photographic film" (Page 5, Line 12), and "devices" should be changed to "device" (Page 6, Line 19).

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Vogel (5668596). Vogel discloses an image conversion system comprising a digital image generation means that reads out an image on photographic film and generates a digital image signal representing the image (Col 4, Lines 45-48), a format conversion means that converts the format of the digital image signal into a predetermined format used in a

digital camera (Col 4, Lines 53-55), and an image signal recording means which records the digital image signal in the predetermined format on a recording medium which can be loaded in the digital camera (Col 4, Lines 50-58).
